MAKRAM ALMOGHRABI

Full Stack Software Developer

Budapest, Hungary | +36 30 746 6581 | contact@makramalmoghrabi.com
makramalmoghrabi.com | github.com/makram24
https://www.linkedin.com/in/makram-almoghrabi/

Professional Summary

Full stack developer delivering web and mobile applications with React, TypeScript, Flutter and Firebase. Built and sold a DICOM medical-imaging application; worked on 25 client projects at Carrot Media. Sole developer of Fleeku, currently awaiting final Apple approval ahead of launch. Based in Budapest and available full-time while pursuing an MSc at BME.

Professional Experience

Full Stack Developer | Freelance | 2023 to Present

- Built the DICOM medical-imaging application end to end as sole developer and sold it to a buyer who markets it to clinics (August 2024 to October 2025).
- Integrated React, Firebase and Cornerstone-based viewing with window/level, pan, zoom and measurement controls, X-ray records and report-status workflows.
- Develop Fleeku, a Flutter/Firebase in-home services platform for Australia, as sole developer (February 2026 to Present); the platform is awaiting final Apple approval ahead of launch.
- Implemented provider-availability calculations using working hours, service duration and booked slots; integrated Firestore chat and BLoC-based booking states.
- Built a GitHub Actions iOS release workflow covering Flutter builds, signing/provisioning checks, IPA export and conditional App Store Connect upload.

Full Stack Developer & Web Designer | Carrot Media | 2022 to 2025

- Worked on 25 client projects, primarily business websites and e-commerce platforms, serving as the solo developer for website and e-commerce delivery.
- Built responsive React/JavaScript interfaces, Firebase data integrations and REST API workflows; worked directly with clients and partner agencies through release and support.
- Delivered the Aisha Ameen architecture portfolio in Kuwait (aishaameen.com), Back Combined Construction (backcombined.com) and Zoufa e-commerce (zoufashop.com).
- Developed a Flutter/Dart mobile application.

Concurrent freelance work was approved in writing and served clients outside Carrot Media's market.

Full Stack Developer (Part-Time) | AWK Development | 2021 to 2022

- Implemented PHP/MySQL features and asynchronous JavaScript/AJAX interactions; debugged backend logic, SQL operations and application defects.

Skills

- Web and mobile: React.js, TypeScript, JavaScript, HTML5, CSS3, Flutter, Dart, BLoC
- Backend and data: Node.js, PHP, REST APIs, MySQL, Firebase/Firestore
- AI integrations: MCP, Zod, Google Agent Development Kit
- Delivery and testing: Git, GitHub Actions, iOS signing and IPA delivery, Node.js tests

Projects

MiniCRM MCP | Portfolio Project

github.com/makram24/MiniCRM-MCP
TypeScript, Node.js, MCP, Zod, REST APIs

- Built a 12-tool Claude Desktop-to-MiniCRM bridge with validated inputs, mock/live backends, concurrency limits and bounded retry backoff with jitter; tested HTTP 429 recovery, retry exhaustion, non-retryable responses and network failures.

ReleaseGuard Agent | Portfolio Project

github.com/makram24/ReleaseGuard-Agent
TypeScript, Google Agent Development Kit, GitHub APIs

- Built an AI-assisted PR review pipeline with evidence-source validation and deterministic release rules; tested failed CI, exposed secrets and destructive schema changes.

AI Smart City Project | Academic / Portfolio Project

github.com/makram24/AI-Smart-City-Project
Next.js, React, TypeScript, Express, Leaflet

- Built a Budapest map assistant with place search and weather, plus configured routing, transit and AI integrations with explicit fallbacks.

React POS | Application Project

github.com/makram24/React-Pos
React, JavaScript, Firebase Authentication, Firestore

- Built staff-facing restaurant workflows for table orders, kitchen preparation, inventory, analytics and printable invoices; added order-status updates and periodic Firestore refreshes.

Portfolio Website | Personal Project

github.com/makram24/portfolio-website
React, TypeScript, Three.js, React Three Fiber, GSAP, Vite

- Built a 3D portfolio with scroll animation, a project gallery, interactive chess and a serverless Groq AI chat endpoint.

Education

MSc, Computer Science Engineering | Budapest University of Technology and Economics (BME) | Expected February 2027

Software Engineering specialization; Smart City secondary specialization.

BSc, Computer Science | Lebanese International University | 2019 to 2022

GPA: 3.56/4.00

Languages

- Arabic: Native
- English: C1

Availability

Available full-time; based in Budapest and seeking opportunities in Hungary and Europe.
